

Index correlates plates with discussions in the text for Burnett's *Coinage in the Roman World*

by Warren W. Esty

Andrew Burnett's *Coinage in the Roman World* is an excellent introduction to Roman monetary history. It is well-

illustrated with photographs of 187 coins which are referenced in the text. Unfortunately, the list of illustrations only identifies the coins—it does not cite the

pages on which the coins are discussed. This index provides those citations, as well as referencing those coins found in the tables on pages 4 and 12. It is suitable for photocopying and will fit nicely inside the back cover of the book. Similar indices for other volumes in this series of Seaby books will be forthcoming.

Coin	Pages	Coin	Pages	Coin	Pages
1	3, 4, 8	63	19, 27, 54, 109	126	124, 142
